

## Letter of Recommendation

We are pleased to recommend Luca Ludoșanu, who worked with Enovate Services SRL as a Web Developer from September 2024 to December 2025.

During this period, Luca played an important role in developing and delivering new functionalities for ERP, CRM, and customer portal platforms used by a key client in the metal roofing and metal battens manufacturing industry. His work directly contributed to improving internal workflows and enhancing the overall user experience.

Luca demonstrated strong technical skills and hands-on experience with modern web technologies, including PHP (Laravel), Livewire, MySQL, JavaScript, WebSockets, and Reverb. He consistently delivered clean, efficient, and maintainable solutions, following industry best practices and high-quality coding standards.

Beyond his technical expertise, Luca impressed us with his analytical thinking, ability to learn quickly, independence, and sense of responsibility. He showed a mature and structured approach to problem-solving and was able to understand both technical and business requirements, making him a reliable and valuable member of the team.

We believe that Luca's practical experience, combined with his strong potential for academic growth, makes him an excellent candidate for admission to a university-level technical program, as well as for entry- to mid-level software development roles. We are confident that he will perform very well in any academic or professional environment.

We recommend Luca without reservation and wish him every success in his future academic and professional endeavors.

Sincerely,

Enovate Services SRL
